

Description

EZEJUMP is the most advanced switched jump-mat available. Controlled by any iOS or Android smart device, with a free app, EZEJUMP delivers maximal data, with advanced options available where appropriate Swift Labs cloud subscriptions are in use. Swift Labs delivers a cloud dashboard for managing athletes and coaches, generating simple reports, and also an API for integration by your AMS provider.

EZEJUMP is constructed of a stainless-steel top with MDF substructure, and our patented switching mechanism. Bluetooth connection is in-built, and no other hardware is required for use.

With our Pro subscription, EZEJUMP's unilateral capability is accessible, delivering delta values between left and right leg contact and flight times.

Also available in this subscription are Bosco stiffness protocols.

NOTE:

Currently we are developing a completely free service where unlimited athletes can be stored locally on your device (without cloud services). Until then we are offering free EXPERT level Swift Labs subscriptions.

Please see our website for details www.swiftperformance.com/ezejump

Specifications

- Dimensions 795 x 795 x 16 mm
- Contact Zones 2 left and right
- Contact Areas
 - total 740 x 740 mm approx. total area
 - left & right each 740 x 360 mm approx. each side (left and right)
- Weight 14.0 kg
- Charging time 1.5 to 2 h approx.
- Operation time > 200 h approx.
- RF Range 10 meter approx. between Mobile Device and EzeJump Mat

- Shipping Dim. 1015 x 925 x 60 mm
- Shipping Weight 19.0 kg
